UEAB Smart Noticeboard

One place for every official notice

Team DESHASHERS | ISC Digital Build-Off 2026

Derrick Okoro (Team Leader) - Sharon Umutesi - Sheldon Kasera

The problem: students miss notices

93% have missed an announcement at least once

67% miss announcements sometimes or frequently

23% check university email several times a day

88% attended a physical meeting that could have been a digital notice

Source: survey of 43 UEAB students (4 schools) and 3 stakeholder interviews, 10-11 Nov 2026

Our solution: one searchable noticeboard

Staff publish a notice once. Students find it in one place.

Administrator

- Secure login and dashboard
- Create, edit and delete notices
- Publish or save as draft
- Notice statistics

Student

- Register and log in
- See all published notices
- Read each notice in full
- Search by title or content

Built with PHP, MySQL, HTML, CSS and JavaScript. Passwords hashed, role-based access, prepared SQL statements.

Live demo (2 minutes)

1. Log in as administrator
2. Create a notice and publish it
3. Log in as a student (or register)
4. Open the dashboard and read the notice
5. Search for the notice by a keyword

Impact and how it sustains itself

Who benefits

Students get one trusted source. Lecturers and departments publish once instead of repeating messages.

Demand

98% of surveyed students (42 of 43) said a central platform would be useful.

Who pays

Free for students. The University (ICT or Student Affairs) runs it on its own server or low-cost hosting.

First 100 users

Pilot with one school and class reps, departments post official notices here first, BITSA promotion, QR codes on notice boards.

Risks and what we build next

Risks

- Students may keep using WhatsApp: staff publish official notices only here
- Weak hostel internet: light, mobile-friendly pages
- Privacy: only name, email and role stored; passwords hashed

Next steps (from the survey)

- Target notices by department and academic year
- Urgent flag and deadlines
- Notifications for new notices
- PDF attachments

Thank you
